

Cooler Brightz™

Instructions

©Copyright Brightz, Ltd. 2018
Patent Pending • All rights reserved

Step 1 – Install Batteries

Unscrew the bottom of the bottle battery pack. Remove the battery holder and insert 3 fresh AA batteries, observing correct polarity (+/-). Align the arrow on the battery holder with the arrow in the battery pack. Slide the battery holder back in and replace the battery cover.

Do not mix old and new batteries and do not mix alkaline, standard (carbon-zinc) or rechargeable (nicad, ni-mh, etc.) batteries.

Caution: *Batteries may explode or leak, and cause burn injury if recharged, disposed of in fire, mixed with a different battery type, or inserted backwards. Replace all used batteries at the same time. Clean battery contacts and contacts on the device prior to installing. Remove batteries if item will not be used for long periods of time. When battery expires remove promptly.*

Step 2 – Operation

To operate, press down on the silicon button on the top of the bottle cap.

Step 3 – Setting up the lights

Lights look best and provide an awesome glow when placed underneath ice.

The easiest method:

1. Add a layer of ice to fill the bottom half of the cooler.
2. Position the LED light string on top of the ice.
The battery pack is water resistant and can be mixed within the ice.
3. Add bottles and/or cans.
4. Add remaining ice.

 *Cooler Brightz™ are not for use in drink dispensing coolers or any beverage dispensing system.*

Do not place Cooler Brightz™ inside drinks.
